

NOBL

ProShares S&P 500 Dividend Aristocrats ETF

Key Takeaways

NOBL is the only ETF focused exclusively on the high-quality companies of the S&P 500 Dividend Aristocrats.

Strong levels of dividend growth

NOBL's holdings are the S&P 500 Dividend Aristocrats—companies that have not just paid dividends but grown them for at least 25 consecutive years, with most doing so for 40 years or more.

A legacy of stability and strength

Often household names, as a group, NOBL's holdings have had stable earnings, solid fundamentals, and often strong histories of profit and growth.

A demonstrated history of weathering market turbulence

NOBL's strategy has captured most of the gains of rising markets and limited losses in falling markets. In addition, the strategy has outperformed with lower volatility than the S&P 500—providing a smoother ride over the long term.

Large-Cap Dividend Growers for the Long Term

The S&P 500 Dividend Aristocrats—Only High-Quality Companies Qualify

Investors looking to build a durable equity portfolio with quality companies at its core may want to consider a dividend growth strategy—specifically one that invests in companies with the longest track records of dividend growth. ProShares S&P 500 Dividend Aristocrats ETF (NOBL) is the only ETF focusing exclusively on the S&P 500® Dividend Aristocrats®—a rare breed of high-quality large-cap companies that have raised their dividends for at least 25 years.

How the Dividend Aristocrats Capture Quality

NOBL's holdings, the Dividend Aristocrats, are often household names. As a group they have demonstrated hallmarks of quality like stable earnings, solid fundamentals, and often strong histories of profit and growth over multiple market cycles.

A History of Weathering Market Turbulence

NOBL's strategy has captured more of the gain in rising markets and less of the loss in falling markets. Moreover, the Dividend Aristocrats Index has outperformed the S&P 500 by an average of 5.13% in four out of five of the worst quarterly drawdowns since inception, and outperformed in 8 out of 12 subsequent periods.

Source: Morningstar. "Up capture ratio" measures the performance of a fund or index relative to a benchmark when that benchmark has risen. "Down capture ratio" measures performance during periods when the benchmark has declined. Ratios are calculated by dividing monthly returns for the fund's index by the monthly returns of the primary index during the stated time period and multiplying that factor by 100. Index returns are for illustrative purposes only and do not represent actual fund performance. Index performance returns do not reflect any management fees, transaction costs or expenses. Indexes are unmanaged and one cannot invest directly in an index. Past performance does not guarantee future results.

Index Highlights

- **25 years of consecutive dividend growth points to the general strength and stability of the index constituents.**
- **Contains a minimum of 40 stocks.**
- **Equal weighting methodology, unlike market cap weighting:**
 - Treats each company as a distinct investment opportunity without regard to its size.
 - Does not have any single large weighting, so the index is not overly dependent on a few holdings for performance.
- **Well diversified across sectors.**
 - Limits the weight of any single sector to no more than 30% of the total index.
- **Is rebalanced quarterly to equal weights in January, April, July and October, with an annual reconstitution during the January rebalance.**
